

Dissemination of Examination Results

Students will be able to view their individualized examination scores on Blackboard/Canvas. Students will receive feedback in the form of a “Strengths and Opportunities” report for Clinical Medicine I, II, and III examinations. The LMU-Harrogate PA Program views examinations as assessment tools, not used as an instructional tool, therefore, students will not be able to view their individual examinations once completed. Students will instead receive a comprehensive examination report which will alert each student individually to topics and medical task areas that need to be reinforced through additional studies.
